## American Vintage

The American Vintage series introduces an all-new lineup of original-era model year guitars that bring Fender history and heritage to authentic and exciting new life. With key features and pivotal design elements spanning the mid-1950s to the mid-1960s, new American Vintage series instruments delve deep into Fender's roots—expertly preserving an innovative U.S. guitar-making legacy and vividly demonstrating like never before that Fender not only knows where it's going, but also remembers where it came from.

The American Vintage Series has long presented some of Fender's best selling guitars (their early-'80s introduction, in fact, was one of the first signs that Fender was "back" as the CBS era ended). Today, Fender has boldly cleared the slate to make way for a fresh American Vintage series with new features, new specs and the most meticulous level of vintage accuracy yet. Rather than just replacing the previous models with different ones, we've completely and comprehensively re-imagined the entire vintage-reissue concept—restoring original tooling dies, voicing new pickups, reformulating vintage colors and more—based on actual vintage guitars we tracked down to make sure we had it right. We did the work, and it shows, because there's pure tonal magic in each new American Vintage instrument.

## Dee Dee Ramone Precision Bass® **NEW!**

Olympic White

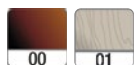

Punk bass starts with Douglas "Dee Dee Ramone" Colvin. As the pounding heart of the Ramones, he pioneered a no-frills sound and style that left a permanent mark on rock music. On a white Fender Precision Bass slung impossibly low, he defined punk bass with simple but breakneck bass lines delivered with such pulverizing sound, speed and conviction that he singlehandedly set the template for generations of punk bassists to come. The Dee Dee Ramone Precision Bass honors him with reverence and authenticity, just like any bassist since who's ever planted his feet in a wide stance, slung a Precision below the beltline and yelled a manic "1-2-3-4" count-off.

## American Vintage

The American Vintage series introduces an all-new lineup of original-era model year guitars that bring Fender history and heritage to authentic and exciting new life. With key features and pivotal design elements spanning the mid-1950s to the mid-1960s, new American Vintage series instruments delve deep into Fender's roots—expertly preserving an innovative U.S. guitar-making legacy and vividly demonstrating like never before that Fender not only knows where it's going, but also remembers where it came from.

The American Vintage Series has long presented some of Fender's best selling guitars (their early-'80s introduction, in fact, was one of the first signs that Fender was "back" as the CBS era ended). Today, Fender has boldly cleared the slate to make way for a fresh American Vintage series with new features, new specs and the most meticulous level of vintage accuracy yet. Rather than just replacing the previous models with different ones, we've completely and comprehensively re-imagined the entire vintage-reissue concept—restoring original tooling dies, voicing new pickups, reformulating vintage colors and more—based on actual vintage guitars we tracked down to make sure we had it right. We did the work, and it shows, because there's pure tonal magic in each new American Vintage instrument.

Coronado Bass

3-Color Sunburst

For the bassist who appreciates a special Fender bass with a special history, the short-scale Coronado Bass guitar has returned with greater sound, build and beauty than ever. In the mid-to-late 1960s, the Coronado family was Fender's first foray into the hollow-body electric instrument world. Now the Coronado name and style have returned in an utterly cool Modern Player bass with stunning looks, tone and features, including a thin semi-hollow body with stylish binding and bound f holes, special humbucking pickups, distinctive headstock, vintage-style bridge/tailpiece and much more.

Starcaster® Bass

Black

One of the rarest Fender instruments ever. Only a handful of prototype semi-hollow Starcaster Bass models appeared during the mid 1970s, distinctive as the only offset semi-hollow bass guitar in Fender history, to say nothing of its two enormous humbucking pickups. After decades of virtually fabled status, the electrifying Modern Player Starcaster Bass offers superior sound, build and beauty ideal for bassists with a flair for appealingly unconventional Fender style. With its thin semi-hollow offset body with stylish f holes, short scale (30"), dual humbucking bass pickups and much more, you could say the Starcaster Bass is "better than it never was."

## California

Fender® California series acoustic guitars evoke the good-vibration days of the 1960s, when the company dived into acoustic guitar production, introduced an entire family of surf-styled instruments with a youthful dose of sun, sand and fun, and shook up the stodgy old world of acoustic guitar design. From Stratocaster® headstocks to custom colors and more, the California series resonates with Fender's innovative '60s-era acoustic legacy.

## PS-512

The Fender® PS-512 is a full-bodied powered subwoofer that pairs perfectly with all Fender Passport® systems that include the “sub out” feature. To dramatically increase your system’s bass frequency output and maximize the power sent to the mid- and high-frequency drivers, simply connect the PS-512 to your Passport system’s 1/4” “sub out” output or other portable PA systems. Making this connection engages a high-pass filtering circuit that dedicates more power to mid and high frequencies. The result is dramatically increased overall volume and greater definition between low and mid/high frequencies.

Take your Fender Passport system to the next level and push bass-heavy music with confidence by adding the Fender PS-512 powered subwoofer.
